## Energy Field

Energy 65 Joules ( $\times 10^{-2}$ ) Balance 98%

Human Energy Field - is the most sensitive reflection of the physical, emotional and, in some cases, spiritual condition of a person.

*Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.*

## Analysis

STRESS: Optimal

ENERGY: Optimal

BALANCE: Optimal

\*ORGANS DISBALANCE, %: Optimal

## Stress

Stress – characterizes the level of anxiety, reaction to the internal and external impacts, and is measured in Relative units from 0 to 10, where 10 corresponds to the highest level of stress.

- **0 - 2** - very calm, relaxed people that may be due to several factors: deep meditation, complete inner peace; the effects of psychedelics; deep sleep in the peaceful phase; at the same time it may be the case of chronic depression or in some cases inflammation, severe disease.
- **2 - 3** - normal calm quiescent state.
- **3 - 4** - the state of anxiety. The state of permanent anxiety without relaxations may be the reason for serious problems.
- **4 - 6** - the excited stress state characteristic of active work, excitement, intense activity. This state is typical in high-level managers, militaries and people with responsible jobs. It may be related as well to the high anxiety level.
- **6 - 8** - at least six possible situations:
  - The reaction to a previous stressful situation (an unpleasant conversation, illness, failure in the training process, driving in stressful conditions, etc.). In this case, it is necessary to calm the patient and repeat the measurement after half an hour.
  - Increased nervousness, accumulated over long periods of time stress, emotional stress, autonomic dysfunction.
  - People with a special type of mentality that can quickly switch from a state of extreme excitement, nervousness, in the quiescent state.
  - The state of overtraining, fatigue, risk of injury.
  - Athletes in the moment of competition, actors at the performance, students at exams, etc.
  - Children in a state of nervous excitement.
- **8 - 10** - a very high level of stress, the peak of emotional excitement. If a patient with activation level 8-10 appears calm, this could indicate a dangerous situation: the person is on the verge of a nervous breakdown, so be aware and exercise caution.

## Energy

Demonstrates the energy of the glow for the particular person in Joules ( $\times 10^{-2}$ ).

- **0 - 20 Joules ( $\times 10^{-2}$ )** - low energy (may be related to energy deficiency, as well as to meditative state)
- **20 - 40 Joules ( $\times 10^{-2}$ )** - decreased energy
- **40 - 70 Joules ( $\times 10^{-2}$ )** - typical energy
- **70 - 90 Joules ( $\times 10^{-2}$ )** - heightened energy - characteristic of people with high level of energy
- **90 - 100 Joules ( $\times 10^{-2}$ )** - high energy - typical for athletes, top managers, at the same time may be an indication of inflammation.

## Balance

- **0 - 50%** - very low balance - indication of serious mis-functioning
- **50% - 90%** - low balance - indication of functional disorder
- **90% - 100%** - typical balance

## Organs imbalance (experimental parameter)

Level of imbalance between overall energy of the glow of sectors present on both hands. It is presented in % of deviation from the average value of two hands and is directly connected with the "Balance" graph. Left hand is connected with the right brain hemisphere and with activation/excitation processes. Right hand is connected with the left brain hemisphere and slowing down/energy saving processes.

- **0 - 5%** - optimal balance between left and right parts;
- **5% - 10%** - average imbalance - temporary adaptation reaction of the organism to any internal or external processes;
- **10% - >15%** - high imbalance - adaptation to extreme influences.

## Area diagram

Reflects energy re-distribution for different organs and systems based on Area parameter.

The Area diagram is designed for analysis of the functional state of the human body, by comparing the glow Area of the fingertip and calibration cylinder.

The optimal energy level corresponds to the green zone in the middle. The inner circle is the area of energy deficiency (hypo-energy state). The outer ring is the area of energy excess (hyper-energy state).

*Bio-Well is not a medical instrument, it is not designed for medical diagnostics, it measures energy and stress of a person. In case of health concerns, please, consult your doctor.*

## Energy diagram

The Energy diagram is designed for analysis of the functional state of the human body, by calculating the Energy parameter of the particular sector (energy of the glow). "Energy reserve" parameter (experimental) reflects energy reserve at the cellular level. Overlaying of the Area diagram (measured in Relative units) on top of the Energy diagram has no physical meaning, but intended for relative comparison of two graphs.

Value on the Energy diagram can be:

- 0 - 2 Joules ( $\times 10^{-2}$ )** - very low energy
- 2 - 4 Joules ( $\times 10^{-2}$ )** - low energy
- 4 - 6 Joules ( $\times 10^{-2}$ )** - normal energy
- 6 - 8 Joules ( $\times 10^{-2}$ )** - increased energy
- 8 - 10 Joules ( $\times 10^{-2}$ )** - high energy

Energy reserve (experimental parameter):

- < 20% - low level
- from 20% to 60% - optimal level
- > 60% - high level

## Chakras

Alignment 91%

According to Eastern metaphysical theories and principles of Ayurvedic Indian medicine, there are seven "Chakras" or integrated energy centers that are considered to affect physical, mental, emotional, and spiritual well-being. In the Bio-Well programs Chakras reflect emotional state of a person. Chakras are related to energy flow internally and externally. They are not stable and may change every other minute. Stability of Chakras is indication of emotional balance of a person. Ideal balance of Chakras may be seen for people involved in daily meditation and mental training.

Shift of Chakras to the right or left (when we look to the picture) can be related to the inner emotional reactions of a person or to the response to environmental situation (other people, electromagnetic fields, weather, etc).

## Chakras

Psychosomatic approach. Connection of functional state of organs with psychological state.

Energy centers (or Chakras) are calculated according to the organs and systems situated in different parts of the body.

Size of the center – medium level of energy of organs and systems that correspond to this center.

Balance of the center (Left/right orientation) – is the difference between the energies of the corresponding to the specific center organs and systems on the left and right hands.

Grey/green corridor on the graph – norm. Left side from the center of the image – social life, extroversion. Right side – private life, introversion.

**Chakra 1 - Red** – self-confidence, sexual power. Extreme right – shy and not self-confident person. Extreme left – too self-confident person, searching for proofs of his/her superiority.

**Chakra 2 - Orange** – material work, job or home. Extreme right – don't want to go out of home, evading problems on work. Extreme left – don't want to return home from work, evading house problems.

**Chakra 3 - Yellow** – willingness to solve problems (personal or other's). Extreme right – not eager to help others, concentrated on personal problems. Extreme left – eager to help anyone just not to work on personal problems.

**Chakra 4 - Green** – love, sympathy, empathy. Extreme right – egoist. Extreme left – altruist.

**Chakra 5 - Light blue** – non-material work (art, painting, poems composition), verbal communication. Extreme right – non-communicative person, not sharing his/her art with others. Extreme left – non-stop talking, show-off person.

**Chakra 6 - Blue** – approach to solving tasks and search of information. Extreme right – thinks that there is only one right opinion – own, all others are not. Extreme left – doesn't have own opinion, always ask for help in any situation.

**Chakra 7 - Magenta** – relations with God, fanatic or atheist. Extreme right – thinks that he/she can do anything and there will be no consequences. Extreme left – waits when God will solve his/her problems.

## Biorhythms

June 2022

When a particular biorhythm is in the upper part of the cycle it indicates beneficial days for activity. When biorhythms are down, these are non-beneficial days. For example, whenever your physical and intellectual cycles are in the lower part, your concentration may also suffer. Being thus diminished, you may have to be cautious when driving or going out. In Oriental countries, people never make important decisions with low biorhythms.
